ELEVATE YOUR BUSINESS WITH

RELIABLE MANAGED IT SOLUTIONS

At GZD, we appreciate and understand the trust that you put in us when you hand us the keys to your technology environment.

With a track record spanning numerous industries across South Africa, we seamlessly integrate into your operations, offering comprehensive services that provide peace of mind regarding the management and security of your IT needs.

INTERNET AND SECURITY

Our Internet and Security Services keep you connected while identifying and managing any associated risks.

TRADITIONAL IT SERVICES

We provide traditional procurement, installation and break-fix support to keep your on-site infrastructure up to date and stable.

CLOUD SERVICES

At a fixed-cost we'll host your data and applications in a managed and secure Cloud environment, enabling you to work from anywhere.

PROACTIVE SERVICES

With our fixed monthly costs we provide predictability, monitoring and protection to reduce unexpected maintenance and downtime costs.

OUR PARTNERS

GZD and our team of experts are passionate about the products we support. We are accredited partners with the following vendors and manufacturers:

- Microsoft
- Fortinet
- VMware
- Veeam
- Mimecast
- 3CX
- Dell
- HP
- HPE
- Lenovo
- CLOUD29
- Liquid Intelligent Technologies

YOUR RESILIENT BUSINESS

Equipping your business to deal with change.

GZD

Having a resilient business means that you can work efficiently now, whilst being prepared to adapt to future change at short notice.

There are multiple reasons for building a resilient business, including demand for hybrid work environments, disaster management, and keeping up with global trends amongst other things.

Our team are experts at assessing your current IT environment, and will advise on how best to incorporate the following “future-proofing” elements into your own IT strategy, ensuring that you can withstand any changes that lie ahead.

1. CONNECTIVITY

A reliable, secure internet connection and secure end-points give your team an environment that is conducive to productivity whilst company data remains safe.

WIRELESS INTERNET

NETWORK SECURITY

2. COMMUNICATION

Keeping your team connected by ensuring that all employees have access to reliable, secure communication platforms.

EMAIL – MICROSOFT 365

VOICE – 3CX CLOUD PBX

3. COLLABORATION

Giving all employees access to the same secure communication and file sharing platforms in order to collaborate effectively and maintain flow of work from anywhere.

MICROSOFT 365

MICROSOFT TEAMS

4. CLOUD COMPUTING

In order to enable a remote workforce, or in the case of an unexpected emergency, your data and applications need to be accessible from anywhere.

CLOUD ACCESS

CLOUD BACKUP

INTERNET AND SECURITY

Keeping you connected while identifying and managing any associated risks.

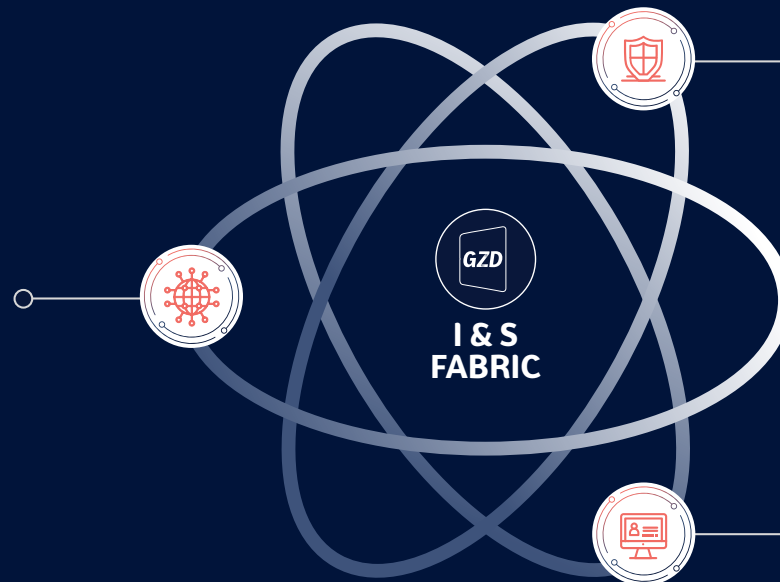

GZD

In our hyper-connected world, a reliable and secure internet connection is a critical business tool.

Our solutions for internet connectivity are based around business-grade fibre and wireless. With connectivity comes security and the inherent risk of threats from surfing and negotiating the internet; our security solutions identify and manage these threats for you.

Fibre & Wireless Network **Connectivity**

GZD enables you to connect your building with a fibre network via a highly reliable leading ISP partner.

Firewall & Antivirus Software

Network Protection

Monitor, protect and manage what is being accessed on your network from within your organisation and externally.

Mail Hygiene, Awareness & Training

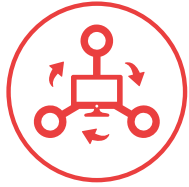

Email Management

Many cyber-attacks are conducted via email, in the form of phishing scams, targeted threats, links to malicious sites or bad attachments.

TRADITIONAL IT SERVICES

Procurement, installation and break-fix support to keep your on-site IT infrastructure up to date and stable.

All businesses have their own unique IT requirements. Although many are migrating to the cloud, your business may still require traditional on-site IT services.

To have a stable IT infrastructure requires the most reliable products and services, which our team of experts can tailor to suit your needs and help you to manage.

SUPPLY AND SUPPORT OF IT INFRASTRUCTURE

- Hardware, such as desktop and laptop computers
- Wireless
- Servers
- Storage solutions
- Backup and disaster recovery solutions
- Network migration and upgrade
- Access control
- Cabling

We also conduct regular assessments to ensure your IT infrastructure meets your current and future business requirements.

OUR PARTNERS

CLOUD SERVICES

Hosting your data and applications in a managed and secure cloud environment at a fixed cost.

With cloud services being simple to adopt, scalable, adaptable and available on demand, cloud computing is the way businesses now operate.

Cloud computing means storing and accessing data and applications securely over the internet, in "The Cloud". It provides easy and affordable access to software, servers and storage. Our qualified and experienced solution architects are available to discuss how cloud works and the benefits for your business. Let us help you get started.

1. CLOUD SERVICES

COMPUTE

- Managed cloud apps and desktops
- Managed hosted servers
- File sharing
