## RELIABLE IT PRODUCTS AND SUPPORT,

### ENSURING A STABLE AND PRODUCTIVE ENVIRONMENT

**GZD**
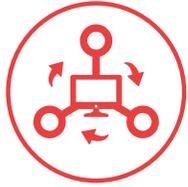

# TRADITIONAL IT SERVICES

*Procurement, installation and break-fix support to keep your on-site IT infrastructure up to date and stable.*

**All businesses have their own unique IT requirements. Although many are migrating to the cloud, your business may still require traditional on-site IT services.**

To have a stable IT infrastructure requires the most reliable products and services, which our team of experts can tailor to suit your needs and help you to manage.

## SUPPLY AND SUPPORT OF IT INFRASTRUCTURE

- Hardware, such as desktop and laptop computers
- Wireless solutions
- Servers
- Storage solutions
- Backup and disaster recovery solutions
- Network migration and upgrade
- Access control
- Cabling

We also conduct regular assessments to ensure your IT infrastructure meets your current and future business requirements.

**OUR PARTNERS**

veeAM   DELL   Microsoft   Hewlett Packard Enterprise   vmware®

# TRADITIONAL IT SERVICES *Supply & Support*

To have a stable IT infrastructure requires the most reliable products and services, which our team of experts can tailor to suit your needs and help you to manage.

## 1. HARDWARE

Our team provides end-to-end support for all your hardware needs, ensuring that you have the right equipment to keep your business running smoothly.

- **Desktop and Laptop Computers:** We supply the latest models from leading brands, ensuring high performance and reliability. Our break-fix support guarantees minimal downtime in case of hardware failures.

- **Wireless Solutions:** Robust and scalable wireless networks to support mobile devices and ensure seamless connectivity across your premises.

- **Servers:** High-performance servers tailored to your business requirements, whether for file storage, applications, or database management.

## 2. STORAGE SOLUTIONS

Efficient data management is crucial for any business. Our storage solutions provide secure and scalable options to meet your growing data needs.

- **Local and Network-Attached Storage:** Solutions that provide easy access to data with robust security measures.

- **Cloud-Integrated Storage:** Combining on-site storage with cloud capabilities for enhanced flexibility and disaster recovery.

## 3. BACKUP & DR

Protecting your data against loss and ensuring business continuity in the event of a disaster is a top priority.

- **Automated Backups:** Regularly scheduled backups to ensure your data is always protected.

- **Disaster Recovery Planning:** Comprehensive solutions to restore operations swiftly after a catastrophic event.

- **Redundancy Solutions:** Implementing failover systems to maintain business operations during hardware or software failures.

**GZD**

**To have a stable IT infrastructure requires the most reliable products and services, which our team of experts can tailor to suit your needs and help you to manage.**

## 4. NETWORK MIGRATION

**Keeping your network infrastructure up-to-date is essential for maintaining efficiency and security.**

- **Seamless Migration:** Our experts ensure smooth migration from old systems to new, minimising disruption to your business.

- **Upgrading Infrastructure:** Implementing the latest technologies to enhance network performance and security.

## 5. ACCESS CONTROL

**Secure your premises and data with advanced access control solutions.**

- **Physical Access Control:** Systems to manage and monitor who enters your premises.

- **Network Access Control:** Ensuring only authorized users can access your network resources.

## 6. CABLING

**Reliable cabling infrastructure is the backbone of your IT systems.**

- **Structured Cabling:** Designing and installing organized cabling systems to support your current and future networking needs.

- **Fiber Optic Cabling:** High-speed data transmission for larger organisations or high-demand applications.

**GZD**
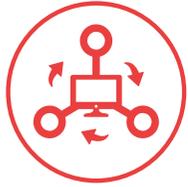

# TRADITIONAL IT SERVICES *Infrastructure Assessments*

**Regular assessments are essential to ensure your IT infrastructure meets your current and future business requirements.**

By conducting thorough evaluations, we help you identify potential risks and opportunities, ensuring your systems are robust, efficient, and scalable.

**1.** **COMPREHENSIVE AUDITS**

Evaluating your existing IT setup to identify strengths and areas for improvement.

**2.** **STRATEGIC PLANNING**

Developing a roadmap to align your IT infrastructure with your business goals.

**3.** **PERFORMANCE MONITORING**

Ongoing monitoring to ensure optimal performance and to preemptively address potential issues.
